## Products

### **BORIS (Best Optical Revolving Inspection System)**

The BORIS is a versatile precision instrument that virtually eliminates setup time on an optical comparator. It's extremely efficient for measuring machined or stamped parts, small molds, and die inserts. The unique 3-axis design allows you to precisely position an endless variety of parts for viewing and inspection.

Accessories included are:

- Accurate Chuck
- Precision Mini "V" Block and Forged Clamp
- Powerful Magnet for Ferrous Parts
- Alligator Clip to Hold Odd Shapes

The BORIS is sold as a complete inspection system including basic holding accessories and complete instruction booklet.

Pricing:

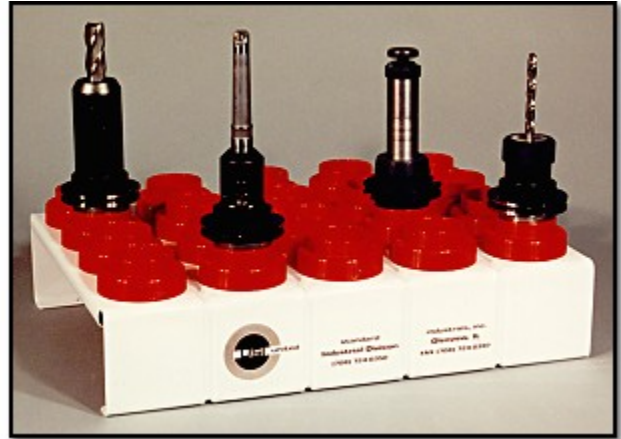

- |                    |            |
|--------------------|------------|
| • Horizontal BORIS | \$1,125.00 |
| • Vertical BORIS   | \$1,195.00 |

For more information, e-mail Steve Feldstein, or call: 847-724-0350.

## USI CNC Multipurpose Tool Holder System

The unit is designed to be used on a standard cart, shelving, or a table top. The transportability allows your company to move CNC tool holders efficiently from tool storage to a tool setter or to a machine.

The CNC tool holder storage system comes with the following features and benefits:

- 20 preassembled color coded polypropylene inserts that protect the tool holder
- Baked white epoxy finish to prevent corrosion
- Built-in handles for transportability
- Heavy gauge steel
- Easy to move on cart
- Great for individual jobs

#### Pricing:

- 30, 35 & 40 Taper Units                      \$169.00/unit
- 50 Taper Unit                                        \$189.00/unit

Inserts are also sold separately in packets of 20:

- 30, 35 & 40 Taper Units                      \$65.00/packet
- 50 Taper Unit                                        \$75.00/packet

Inserts are ribbed for maximum protection against damage to tool holders.

For more information, e-mail Steve Feldstein, or call: 847-724-0350.
